# day 3

→ successfully migrated data from API to the sanity using migration script

→ fetched the data using grok query language language looks like this

```
const getProductData = async () => {
  const response = await client.fetch(`*[_type == 'products']{
    _id,
    title,
    description,
    image{
      asset->{
        url
      }
    },
    price,
    category->{title}
  }`);
  return response;
};
```

→ then shown the data successfully to the UI
